COMPLETING PERENNIAL AND BULB BEDS---PRIZE AWARDS

Hardy perennials are becoming grant popular every year, and no wonders popular every year, and no wonders popular every year, and no wonders grant to the spring.

All perennials do best in a loose of german ities, and of which year producing a wealth of the mellowed by the use of sharp year producing a wealth of the manufacturing states as a popular every year, and no wonders appear in the spring.

All perennials do best in a loose over. It is perhaps more destrable, when limited as to planting space and number of bulls, to have some flowers in bloom every day for several weeks of sharp and, sifted ashes and leaf mould. Fertilizers should be applied should be grantingly, and when applied should be considerable time will be saved by planting with the warmer summer.

The cost of print paper is rapidly instanced and when desired and whith a care over. It is perhaps more destrable, when the coming of spring the itities and this paper with a planting spring the itities and the planting. Not when the coming of spring the itities and the planting with the coming of spring the itities and the planting and the warder of provide and which and the planting and the white and the planting and the planting

BULBS FOR A CITY YARD.

It would seem that the planting of spring flowering bulbs in city back-yards would be more general if it was realized how easy it is to obtain good results and how little attention is required after planting. By selecting an assortment of hyacinths and the various species of tulips an almost uninterrupted display of flowers can be had from the latter part of April until early in June, during a time when the beauty of the yard can be enjoyed in be proud of both as to eize and quality.

AUTUMN BULB PLANTING.

It is only a little garden, as gardens stones. go, perhaps fifty feet square; a border When finally raked over nicely there thus obtain new colors. Some of this bed of perennials runs down one side was a triangular bulb bed about 16x fall's placting will blessom next sumand across the back, and in the early 16x24 feet in size, with a garage shudspring, even before the snow is all ing it on the west, large oak trees on like pull them up, you will be sure to gone, the little crocuses in a dancing the north and south and a fairly open have some good ones. row, border the edge of these beds, space for morning sun on the east. Later on in April and May, just within When we'd had builb beds elsewhere in the line of crocuses, the daffodils and the yard they were unsightly after poets narcissi appear. like a fairy their beauty had faded. Here, after army, in marching rows. I like the blossoming their dying foliage would trumpet daffodils best. The bicolor net be so obtrusive. Emperor and Empress are also favorites. In a half circle around an old pear tree are the Darwin tulips, and n few of these wonders among double tulips, the blush-white and rose Murillos. In a bed all by themselves are Madonna lilles, a hundred of them nodding and bending with the June breezes and wafting their fragrance over the little garden. All these bulbs were planted last autumn, and every fourth year in autumn the crocus. fourth year in autumn the crocus, tuilp and lily bulbs are lifted from their beds, separated and rich dirt worked in with the old, being very care ul not to let any fresh manure touch the bulbs. The daffodils can stay in the ground five or six years without transplanting, but all these bulbs increase and multiply so fast that in a the triangle a horder of white and yelfew years they crowd one another un- low crocus, one-half dozen bulbs in

to obtain from a druggist or hardware orders, and in some cases have paid a fair showing of blossoms dealer, who is only too glad to have it double the retail price to obtain suftaken off his hands. A sufficient quan- ficient stock to meet their require- cold frame seems indispensable.

In planting hyacinths I have found | Labor in Holland is scarce, and there finds many perennial seedlings not

and shortage of shipping vessels many of the French and Holland bulbs have the ready for next summer's blossome each of only arrived recently, and as the cases rember. Whether one buys a few dozen or several hundred bulbs, it is dozen to several hundred bulbs, it is bloom almost simultaneously, whereas well to remember that in order to obtain the best results "cheap," undersized bulbs should be avoided. Experising time considerably.

When it comes to the Darwins the most magnificent of all tulips, which are small as remaily as possible, and the class of eaf covering in winter indeed, but have to be unpacked and the bulbs of eaf covering in winter indeed, but have it shows on Lake Error shows of eaf covering in winter indeed, but have it shows on Lake Error shows on Lake Error shows of eaf covering in winter indeed, but have it shows on Lake Error shows of eaf covering in winter indeed, but have it shows on Lake Error shows of eaf covering in winter indeed, but have it shows on Lake Error shows of eaf covering in winter indeed, but have it shows on Lake Error shows of eaf covering in winter indeed, but have it shows on Lake Error shows of eaf covering in winter indeed, but have it will be a feet overing in winter indeed, but have it will be a feet overing in winter indeed, but have it will be a feet overing in winter indeed, but have to be unpacked and the bulbs whereas the mixture when composed of a number of varieties lengthenes the bloom almost simultaneously, whereas the mixture when composed of a number of varieties lengthene to be unpacked and the bulbs whereas the mixture when composed of a number of varieties lengthene to be unpacked and the bulbs whereas the mixture when composed of a number of varieties lengthene to be unpacked and the bulbs whereas the mixture when cases the indicate the first which are affined to be unpacked and the bulbs.
